Hello Don,

The Town of Wallingford does not charge for review of the application. It would be the Owner's responsibility to have their lawyer draw up the required agreements. We would review the documents along with assistance from the Law Department. The owner's attorney would need to make revisions to the documents in order to get approval from both the Town of Cheshire and Wallingford.

The only fees due to the Town of Wallingford would be connection charges, assessments and permit fees. The property owner would become a Wallingford Sewer customer and be responsible to pay the quarterly sewer bill.

If there are charges for the Town of Cheshire I would assume the home owner would be responsible to pay those fees directly to the Town of Cheshire.

The sewer lateral and grinder pump would need to be installed in accordance with the Regulations, Technical Standards and Details of the Wallingford Sewer Division.

Please let me know if you need any other information.

Regards,

Good morning Erik. I am wondering if this arrangement would put the onus of responsibility for the payment of any applicable plan review, inspection, legal review, connection, and annual sewer use fees directly on the property owners, or if the Town of Cheshire would be billed and have to recoup any of these costs from them if approved by our WPCA. Don
