Request for Determination Letter for Shed Installation

To Inland Wetlands and Watercourse Commission:

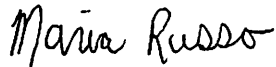

We have applied for a permit to place a 10' X 16' storage shed at the rear of our property. We were advised that the preferred placement is close to the wetlands area of our property and the placement encroaches on the edge of the wetlands area per the map we were provided. We feel that this is the best placement for the shed visually as it will not interfere with our neighbors' properties or sightlines and it will be out of the way so we can enjoy the rest of the backyard. I have attached a picture indicating the desired spot.

The shed will be installed on a level area with crushed stone on top; similar to the picture shown in attachment. No excavation is needed, only minimal leveling will be necessary. I have also enclosed the style of shed, if needed.

Our shed will be used to house typical lawn and garden items such as hoses, gardening tools, lawnmower, snow blower, as well as our bicycles and skis. There will be no hazardous material stored.

Thank you in advance for your consideration. Please do not hesitate to contact me directly if there are any questions or if we have left out any pertinent information.

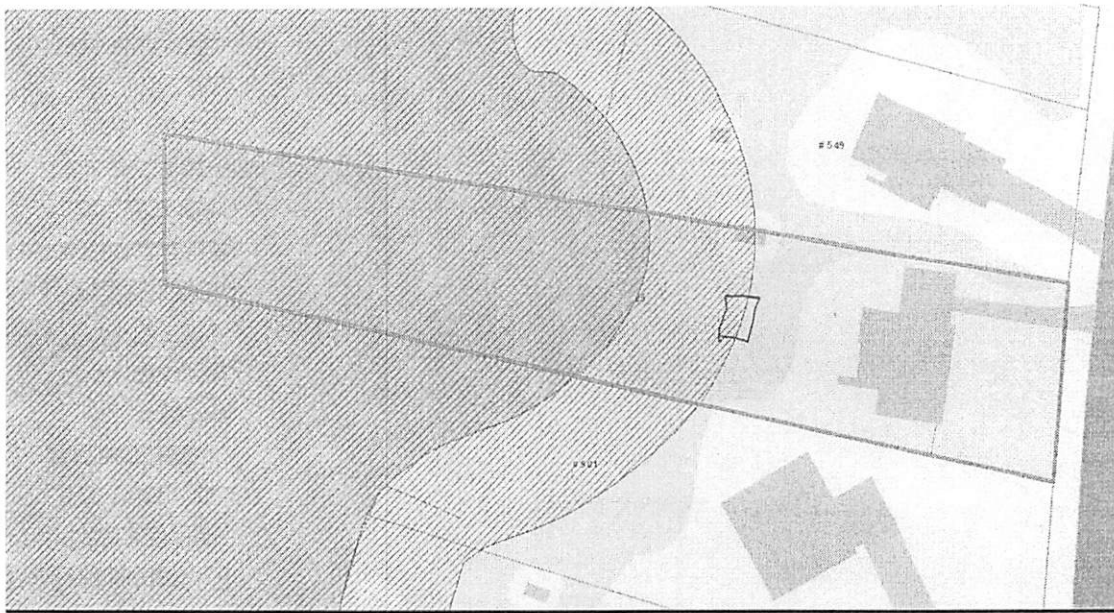

Respectfully,

Maria Russo and Shannon Zyla
